Automation Coding Test - Winn.Ai

Please implement the following automation on website: https://www.saucedemo.com/

Please go to the following URL and validate you can't access without login:
https://www.saucedemo.com/inventory.html

Open the following users, and start a session with them, each user in a separated tab:
- standard_user, secret_sauce
- locked_out_user, secret_sauce
- performance_tester_user, secret_sauce
- problem_user, secret_sauce
- performance_glitch_user, secret_sauce

The session:
1. Wait to load all items for 3.5 seconds
2. View item with title: ***Sauce Labs Bolt T-Shirt***
3. Add this item to Cart
4. Go back
5. Add from items list the item: ***Sauce Labs Bike Light*** to cart
6. Validate the button was changed to "REMOVE"
7. Click on the shopping card bottom on top right corner
8. Validate you have 2 items
9. Click "CHECKOUT" button
10. Fill details:
    a. First name: Dave
    b. Last Name: _____ (Keep empty)
    c. Zip: 31441
11. Click "CONTINUE"
12. Print the error message to the command line
13. Fill last name: "Parker"
14. Click "CONTINUE"
15. Print the Total sum to Command line
16. Click FINISH
17. Validate you got:
    a. message THANK YOU FOR YOUR ORDER
    b. Image with file name that includes both words: "pony", "express"
18. Logout
19. Open and play from the local drive the mp3 file of: C:/data/music/jimi_hendrix.mp3

That's all.
